

Agency - Empowering Your Mathematics Students

Presenter & Facilitator: Richard Andrew

Attn: Mathematics Leaders & Teachers

Is this you?

Too many of my students take little-or-no responsibility for their learning.

I need my students to be genuinely engaged. I need them on my page, not opposing me.

I explain mathematics really well. Yet many students simply don't get it!

I really like the self-paced nature of this course, the repeated reminders of what's good for the students and wonderful interactions with Richard. I'm inspired by the course to continue the good work of putting students in the centre so we can endeavour to help each individual grow collectively through the power of open-ended tasks/questioning and metacognition. Yes, the course has had positive changes in me. Thank you!
